

SUMMARY OF QUALIFICATION (Professional/Career Objective)

- Have worked as QA for 5 years, have a lot of experiences on preparing test cases, test method, test reports, test plan, and very familiar with Scrum process as well.
- Expand automated test cases and cooperate with other members to maintain code through Git, help to build a new test node in Jenkins. Have fundamental ideas in those tools.
- Clarify the reproducing steps and rates, assist debug within firmware part.
- Truly a conscientious worker that always put the quality stuff at the first place and brought good outcome to reduce work loading between creative groups of each team.
- An easy-going person that brings Asian thoughts, offers Mandarin Chinese if needed. This is not just about language but also about culture.

EXPERIENCE

Quality Assurance | [Barco N.V.](#)

New Taipei City, Taiwan | Aug 2017 – now

- 2021 Devoted myself with the wireless projector for more than 4 years, and am the most experienced quality employee working between Agile team and system validation team, keeping quality and ensuring no S1, S2 blocking issues cause release delay. 曾經為SQA擋下幾條BUG讓產品進入regression test之前及時被修復。
- 2019 Turned into a tester in the Scrum team, working with a team of 6 engineers and 1 product owner. More communications, analysis, and high-sensitivity in software.
- 2018 Led the main-brand project in test team, assisted with interns and managed issues as scheduled. Maintained the quality improvement and ensured no critical bugs blocking the release.
- 2017 Hired by a Belgium company ~~till now~~, concentrating on system validation testing. Be the best QA who found the most bugs in 5 months.

QA Test Intern | [Monmouth Technologies](#)

Kaohsiung City, Taiwan | Jan - July 2017

- Dedicated in web testing for the software product – ezTeamwork, a project management system, which is a collaboration-oriented tool for efficient teamwork.
- Took part in Agile workshop
- Helped to maintain the user guide by HTML
