CIeNET International

7303 Warden Avenue, Suite 105, Markhan, ON L3R 5Y6

Dear Hiring Manager:

I am writing to inquire about the opening position of Software Quality Assurance Engineer. With 5 years of experience in QA, I have an excellent understanding of testing principles and a passion for finding problems from the user perspective. Graduated from Shin Chien University in Taiwan in 2017, I am ready to come to Canada anytime with a work permit approved through the International Experience Canada program.

Not only am I used to Scrum development flow with tools like Jira and Confluence, but I am also able to maintain and add automated testing scripts using RobotFramework and Python. Through my experience at Barco N.V., tested registration status among back-end servers. Planned regression testing for library or API updated to avoid side effects. The experience section of my attached resume highlights my career profile which is also in alignment with this position.

I believe CIeNET would benefit from my skills in the following areas:
- Three years experience in Scrum tester, a total of five years in QA
- Executed app testing on five OS platforms including mobiles, desktops, and Chromebook
- Familiar with Jira, Confluence, Testopia, and Bugzilla
- Positive attitude and ability to work under pressure
- Certified the course of ISTQB (International Software Testing Qualifications Board)

Software testing has been playing a big role in my life while pushing me to learn different testing methods, tools, and frameworks continuously. Throughout my tech industry career, I learn to never hesitate to raise a problem and solve it. Also co-hosted activities such as International Volunteer Camp and Welfare Committee at Barco N.V. which demonstrate that I am a great team player.

I would love the opportunity to share more with you in an interview, and also learn more about this or any position in your organization. Thank you for your time and consideration, I look forward to hearing more from you.

Sincerely,
Jill Niu
